

TRENDIFY

(An E-commerce web app made with MERN Stack).

Presented by: Priyal yadav

DESCRIPTION

Q. What is TRENDIFY?

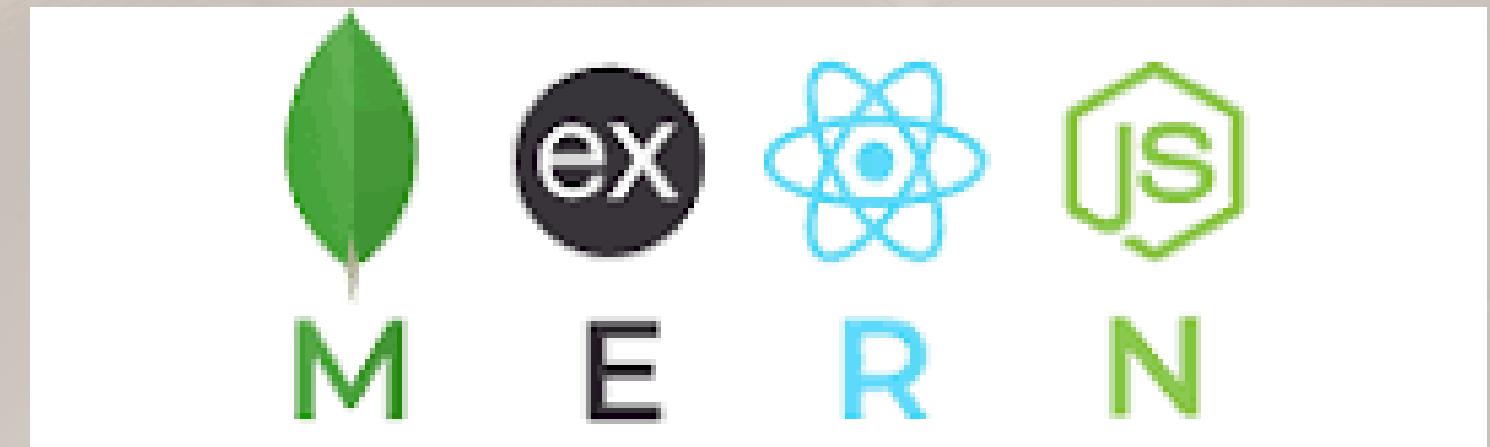

TRENDIFY is a basic e-commerce web application that allows users to explore and shop across various product categories.

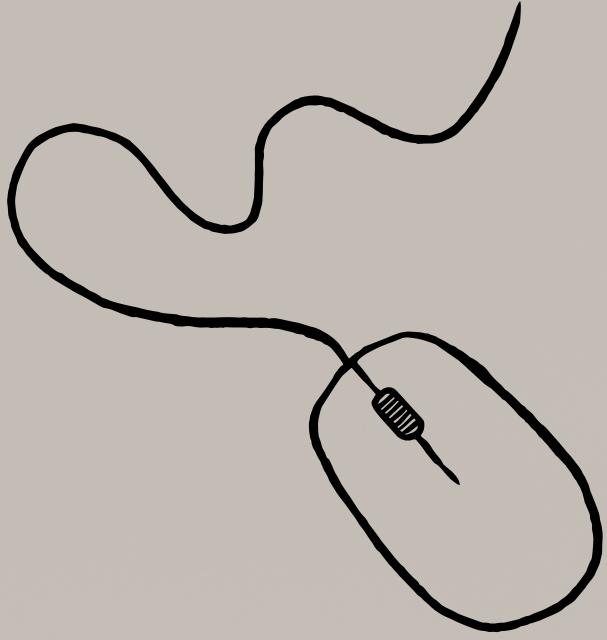

- 🛍️ View categories and subcategories for Women , Men and kids.
- ⭐ Each product displays name , price , ratings and details.
- 🛒 Users can add products to the cart.

What is MERN

MERN is acronym for four main components or can say four main technologies that are :-

1. **M** stands for **MongoDB** for storing products and data.
2. **E** stands for **Express** for developing node.js web framework.
3. **R** stands for **React** used for developing client-side JavaScript framework.
4. **N** stands for **Node** for developing the premier JavaScript web server.

TECH STACK

Frontend: React.js , CSS

Backend : Node.js , Express.js

Database : MongoDB

Tools : VS Code, npm

PURPOSE & GOALS

🎯 The purpose of Trendify is to apply full-stack development skills by building a simple e-commerce website using the MERN stack.

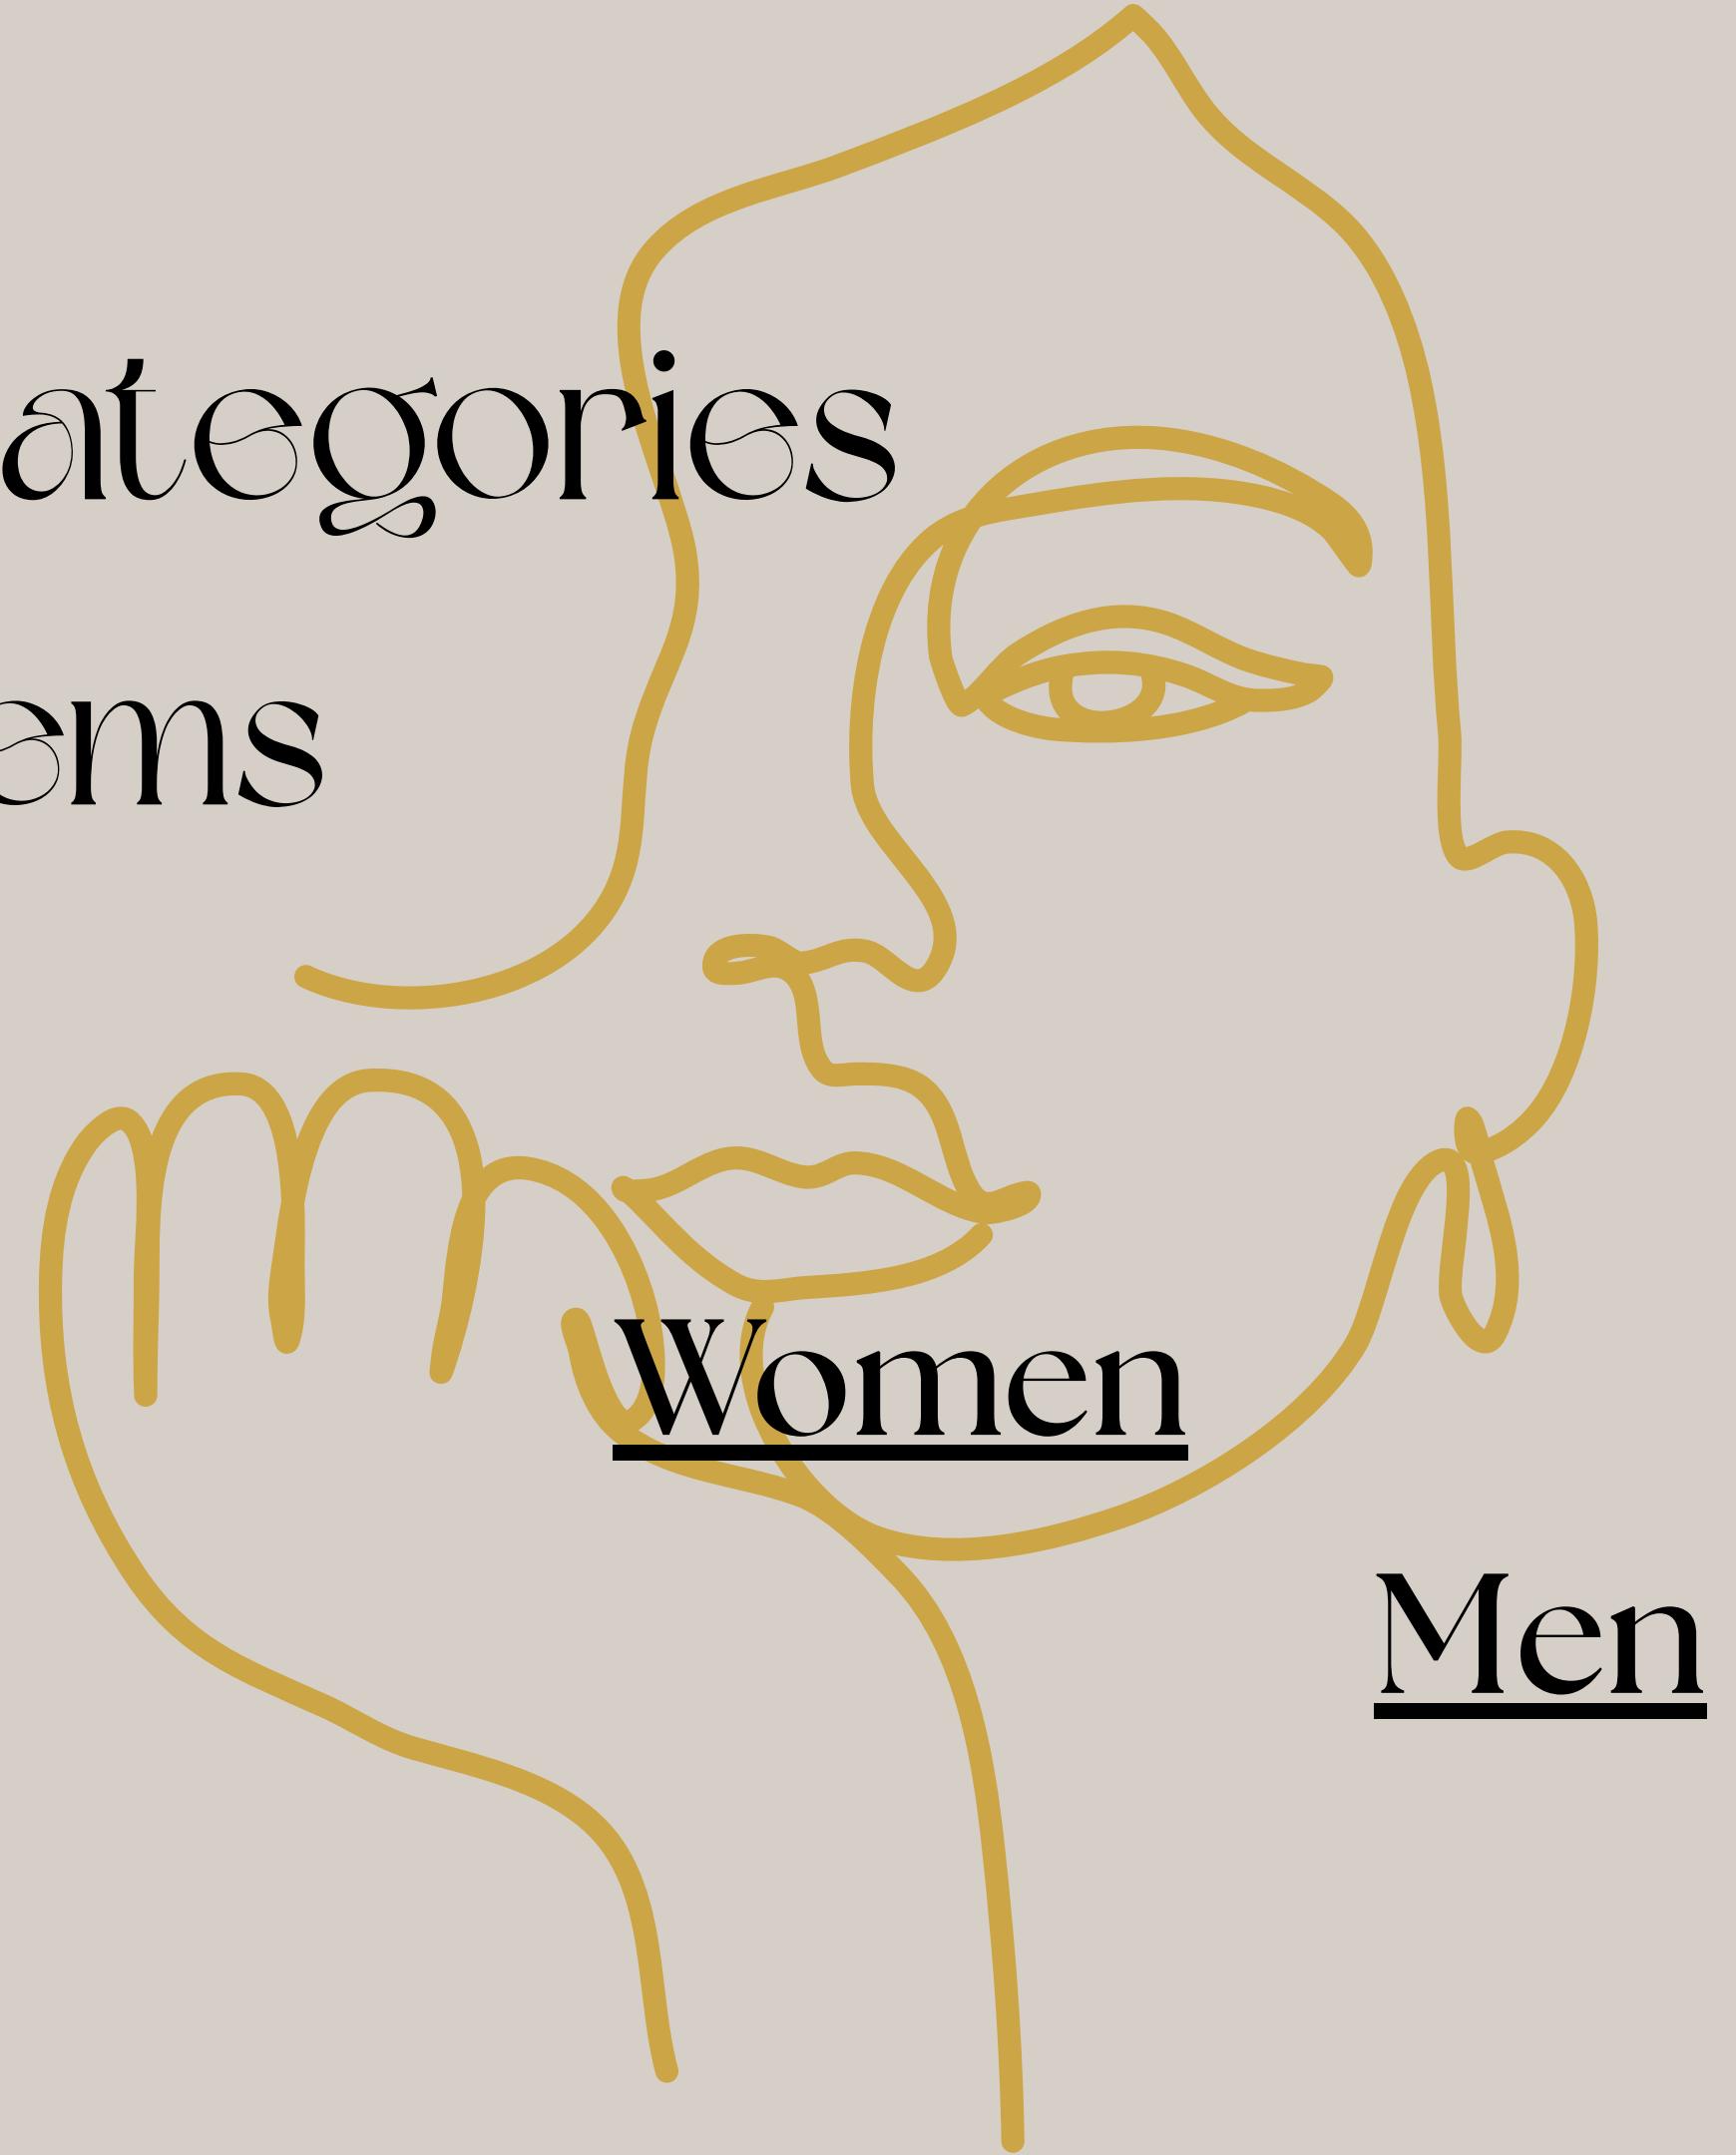

The goal is to create a clean and basic shopping platform that allows:

- Browsing products by category
- Viewing product details
- Adding items to cart
- Admin control for managing products

The focus is on functionality and learning, without login or payment complexity.

Product Categories & Items

Men

Kids

WOMEN

TOPS
JEANS
SANDALS
ACCESSORIES

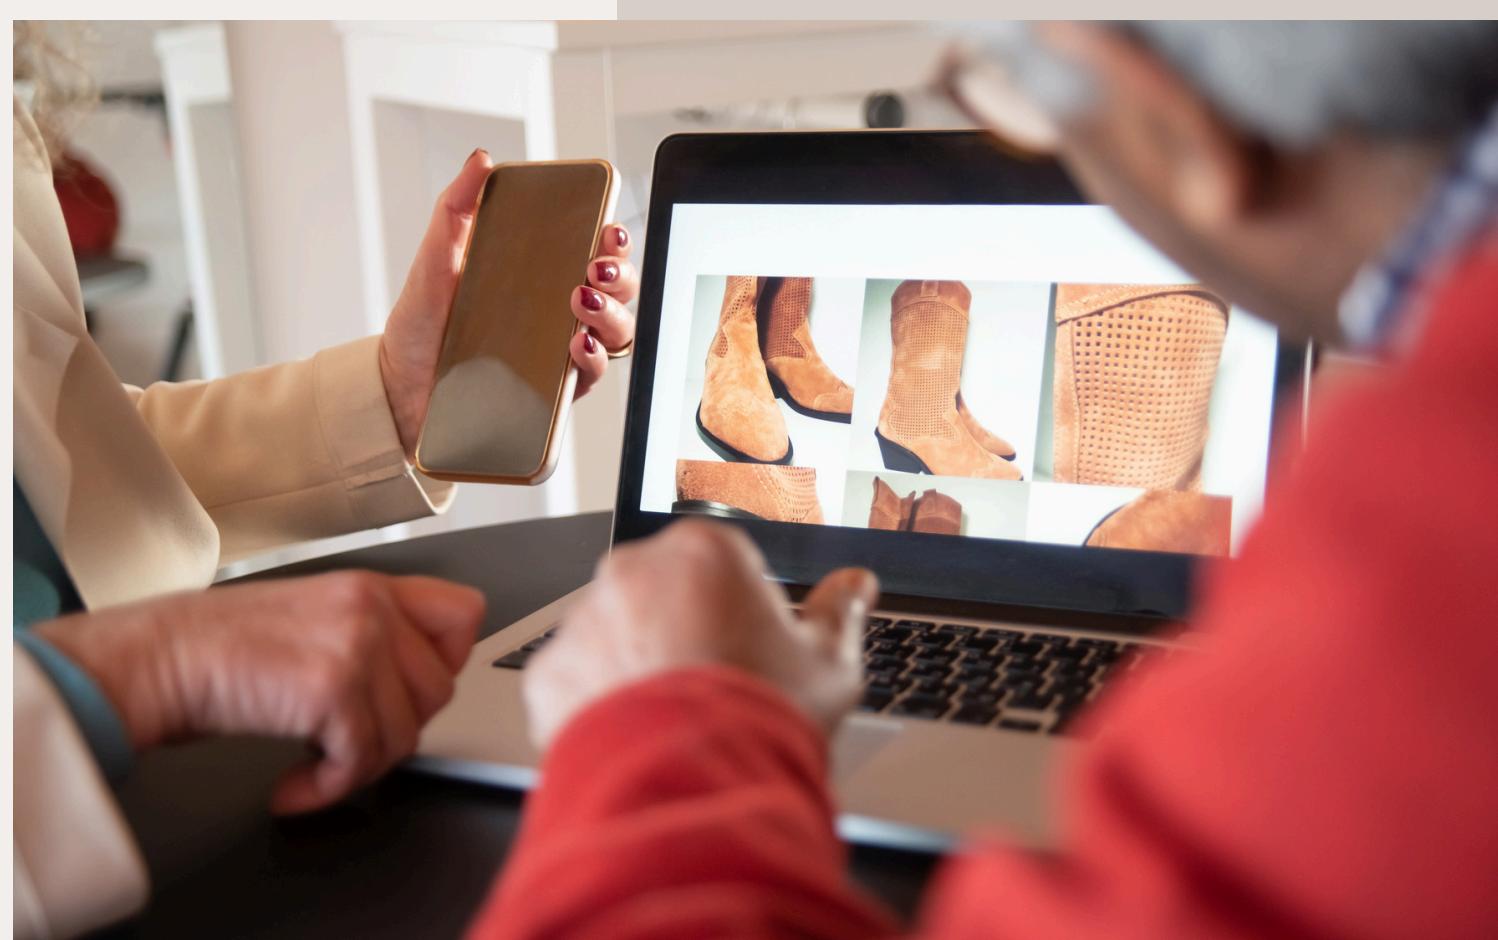

Brand
Fashion

T-SHIRTS
PANTS
SHOES
WATCHES

MEN

KIDS

TOYS
DRESS
FOOTWEAR

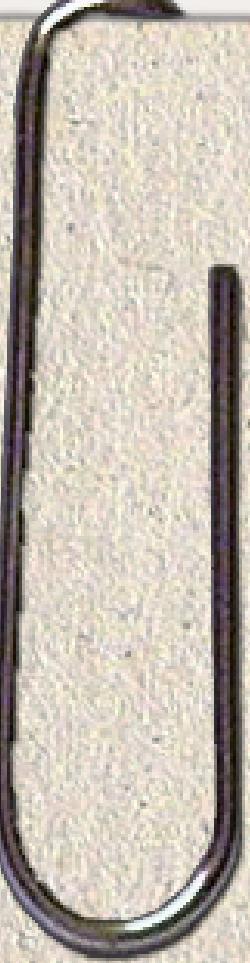

WHAT CAN BE IMPROVED

Future
Improvements:-

- ADD USERS LOGIN/SIGNUP
- IMPLEMENT ORDER HISTORY AND TRACKING.

THANK YOU!

Thank you for your time and attention! 😊
